

## **To the Tune of Wheels on the Bus**

**Producers of an ecosystem make their own food  
Make their own food, make their own food  
Producers of an ecosystem make their own food  
From the light of the sun**

**Consumers of an ecosystem eat other living things  
Other living things, other living things.  
Consumers of an ecosystem eat other living things  
Herbivores, Omnivores, Carnivores.**

**Decomposers of an ecosystem break down the dead stuff  
Break down the dead stuff, break down the dead stuff  
Decomposers of an ecosystem break down the dead stuff  
And put nutrients back in the soil.**
